

Digital Entrepreneurship

[Highlights](#) [Publications](#) [Donors](#)

Internet and mobile technologies are powerful tools for creating high-value jobs and strengthening social inclusion. The Digital Entrepreneurship Program supports the growth of competitive mobile applications industries in emerging and frontier markets. The program is scaling Mobile Application Labs (mLabs)—incubation facilities and innovation hubs for digital entrepreneurs—in Kenya, South Africa, and Senegal.

Mobile Application Labs (mLabs)

mLabs are regional incubation facilities for mobile software entrepreneurs that offer physical work spaces, state-of-the-art equipment and testing facilities, business skills training, and access to early-stage finance through investor networks. Explore the map to learn more about mLabs and local innovation hubs (mHubs).
