

We enable organisations to **measure** and **maximise** their impact by digitising their fieldwork.

Collaborating for Global Impact

Since 2007 we've worked alongside leading organisations to scale their impact through thousands of frontline workers in over 50 countries.

Explore Key Features

Mobile Data Collection

Design forms yourself in minutes. Supports offline data entry, including real-time validation and advanced inputs.

Workflow Automation

Embed algorithms & decision-support tools to guide frontline workers.

Central Handset Administration

Prevent handset misuse by limiting access to only the apps you approve. Avoid costly downtime caused by fieldworkers tampering with settings.

Contextual Communication

Push notification & SMS support for alerts and notifications.

Data & Team Management

Full data edit audit history. Fieldworker management & performance reporting.

Instant Reporting

Chart, map and export data captured. Leverage powerful filters to create & share insights.

Integration & Interoperability

Our tools are compatible with the XForms standard and our flexible [API](#) allows you to integrate with third-party systems and databases.

Data Security

[Download](#) our data management white paper to see how we leverage world class infrastructure and industry best practice to protect your data.

Our latest thinking from the blog

Mobenzi in Uganda: what donors, government and NGOs have to say about digital transformation

Blaise Peccia-Galletto

We recently spent time in Kampala, Uganda, working with a range of stakeholders from NGOs, donors and government on best practice digital fieldwork. This article provides a summary of the incredible i ...
